About This File

I take back what I posted a few weeks ago. THIS is my most ambitious project to date. I took the flaming pile of digital garbage that I put out back in February (Tecmo Super Bowl 1977 - NES) and updated it with 16-bit graphics.

To go along with the visual upgrade, I went through it player-by-player and updated all of the ratings, jersey numbers, skin color, and simdata. I also updated all of the team simdata so that the SKP teams during the regular season play similar to their real-life 1977 counterparts. When simulating a test season, the game correctly simulated four of the six division winners. Only the AFC East and West were incorrect, and with those, the teams in 1st and 2nd flip-flopped.

I updated the schedule in the game so that it accurately reflects the 1977 season.

During the player rating editing process, I found the AV scores (approximate value) on pro-football-reference.com for each of the players to be a HUGE god-send.
