Is it possible to change the skin color in the cut-scenes?
(Or even better: "Connect" the skin color of each team, to the cut-scenes?)

Which cut scenes are you looking for?
- The during gameplay scenes?
- The game intro scenes?
- The division winner scenes?
- The conference winner scenes?

Doesn't the skin color of the players in the cut scenes correspond to the players on the regular field? Why would you want to change it?

The dark skin color is *always* "06-Red" in the cut-scenes, so when using a team with that particular color for their helmet/jersey it's "hard" to tell the difference between skin and uniform. That's why I'd like to change the cut-scene skin color.

It would be nice to have players on the field all the same color but show the correct one in cut scenes to fix racial defect plays.

On a similar note: In the field goal scene, when hitting the goal post for either a point or a miss: Is the locations of the endzone colors known by anyone here?
I'm working on a "plain" green field (Tecmo logo already removed), and it would be a nice touch if the cut scene-field did match the field during gameplay. Changing the colors of the endzones during gameplay doesn't affect the cut scenes, ...

Check my colour location thread for the info. I am 99% I posted it there. as the cut screen endzone colour is linked to the title screen

No. Didn't fint the location in your thread. Can't imagine myself missing it either, as I have spent a lot of time there... very useful thread! I'm just gonna keep messing with the code around the cut scene skin color locations...

According to this file I found while poking around on here the locations for the skin colors

Members

⊕ 10

80 posts

that you cant get to with Tool are
Light Skin Color on Game Field
0x2C2C0-0x2C2C1
Light Skin Color on Action Sequence
0x341E4-0x341E5
Dark Skin Color on Action Sequence
0x341E9-0x341EA
I haven't tried to test this or anything, but its worth a shot
