Does anybody have the hex locations, for the Team Rankings screen, on the NES?
I added a 16th and final team, to the 15 team CIFL rom, but the team don't show up on the rankings screen. It's the only thing I need, then we can have a 2011 Arena football rom.
Any info would be helpful, but I'll keep searching.

so you've got the team in there - it just doesn't show up "graphically" on the Season-Mode "Team Rankings" screen? I will take a look-see.

Thanks Buck!

I've attached the rom. Utah Blaze does not show up in the team rankings.

Yes, I got it in after about a week and a half looking every night through code for two to three hours. My eyes were like this. 😂 I tried to understand the debugger. I just can't grasp it.

I noticed string of hex at X325BF that looked like the team numbers. Then, I seen a gap that had three 00 in a row, where as all the others had two. I put 0F in the first set of 00's and voila! it worked. I was fucking ecstatic!!! Then I noticed the new issue. I looked and looked and will continue to do so. Thanks for any help Buck and or anyone else! 😂

around x23bc6, I can see the mini-helmet data for that 16th team (x23c11)....but it's not being called up for that screen. so I believe there's some sort of "code" (assembly hex) needed to be modified so that it grabs all the teams. I'm sure you already knew that. probably a simple fix - who made this ROM anyways? sorry, can't help.

Change x2397D, x23985, x23989, x23991 = x10

Buck, I made the original rom: viewtopic.php?f=100&t=11792

For anyone interested the hex locations and explanation for changing team rankings screens:

The first group is for the offense and the second group for defense I believe:

X2397d change from 00 0E to 00 xx (where xx = 1 plus the number of teams in both leagues)

X23980 change from 00 0E to 00 xx (where xx = 1 plus the last team in the afc)

X23985 change from 0E 1C to XX YY (where xx = the first team in the nfc and yy = 1 plus the last team in the nfc)

X23989 change from 00 0E to 00 xx (where xx = 1 plus the number of teams in both leagues)

X2398B change from 00 0E to 00 xx (where xx = 1 plus the last team in the afc)

X23990 change from 0E 1C to XX YY (where xx = the first team in the nfc and yy = 1 plus the last team in the nfc)

Hope this is helpful.

from mr. jstout:
For the CIFL rom, the leaders page:
x30041 = ALL LEADERS
x3003A = ATC LEADERS
x31F81 = GLC LEADERS
Value = # of Teams

There's one more bug for that 16th team. The 16th team will not make the playoffs unless they win the division. If you used the one I made as the base, I believe I corrected it. If not, then it needs to be fixed as well.

It's in the playoff bracket portion of the code. There were like 6 bytes or so that were off. You might wanna check this out. I don't have the exact locations, because I never write stuff down. 😞
