Does anyone know how the game applies the palette of the winning team to this screen?

I'd like to apply the palette of the winning team to all of the scenes in the credits which are in color to make the credits seem more like a year in review for the winning team or something.

TSB TOOL!

When you first open tsbtool, go under the menu and check "show colors" (or something like this)

When you load the rom you'll now see the team colors and will be able to change the SB colors

both replies don't understand the question. he is saying: "Does anyone know how the game applies the palette of the winning team to this screen? **I'd like to apply the palette of the winning team to all of the scenes in the credits which are in color** to make the credits seem more like a year in review for the winning team or something."

If he's saying he'd like for TSB to automate colors into the way black & white end credits cut screens show the winning team--good luck! 😊

Trying to keep this answer fairly short. TSB has a draw screen routine that handles the

Members

537 posts

screen and effects. The relevant draw section for the screen you want is:

```
SUPER_CHAMPION_SCREENS :  
  
    .BYTE $C8  
  
    .BYTE $F1  
  
    .BYTE $F7, $20  
  
    .BYTE $C0, $01, $88, $18, $1A  
  
    .BYTE $F9, $02, $B6, $B7  
  
    .BYTE $F6  
  
    .BYTE $8A, $42  
  
    .BYTE      "SUPER CHAMPION"  
  
    .BYTE $FD, <L_7_ADF9, >L_7_ADF9 ; Commands to Draw Team Name  
  
    .BYTE $FA, $1B                ; Set Team Colors  
  
    .BYTE $E5, $FF  
  
    .BYTE $F3, $44  
  
    .BYTE $FB, $F0  
  
    ...
```

The FA 1B command does the following code:

```
L_24_8BCB: ; Do FA 1B command  
  
LDA #BANK27
```

LDY #<L_27_800C

LDX #>L_27_800C

JSR bank_swap_8000_jump

LDA #02

JMP L_24_8C48

L_27_800C: JMP L_27_82BA

L_27_82BA: ; Set Palette Buffer

LDY #E0

: LDA L_27_84F4-\$E0,Y

STA \$031A-\$E0,Y ; Store in Palette Buffer

INY

BNE :-

JMP L_27_8290

L_27_8290: ; Set Team Colors

LDA \$6E ; Team

ASL

ASL

TAX

LDA L_27_8484+0,X

STA \$031B

STA \$032B

LDA L_27_8484+1,X

STA \$031C

STA \$032C

LDA L_27_8484+2,X

STA \$031F

STA \$032F

LDA L_27_8484+3,X

STA \$0320

STA \$0330

RTS

The Palette Buffer is then transferred as the screen palette later.

I had forgotten all about this. So all I need to do is find the correct place to insert FA 1B for each of the credit screens?
